Power Maths White Rose Edition calculation policy for UKS2

The following pages show the *Power Maths White Rose Edition* progression in calculation (addition, subtraction, multiplication and division) and how this works in line with the National Curriculum. The consistent use of the CPA (concrete, pictorial, abstract) approach across *Power Maths White Rose Edition* helps children develop mastery across all the operations in an efficient and reliable way. This policy shows how these methods develop children's confidence in their understanding of both written and mental methods.

KEY STAGE 2

In upper Key Stage 2, children build on secure foundations in calculation, and develop fluency, accuracy and flexibility in their approach to the four operations. They work with whole numbers and adapt their skills to work with decimals, and they continue to develop their ability to select appropriate, accurate and efficient operations.

Key language: decimal, column methods, exchange, partition, mental method, ten thousand, hundred thousand, million, factor, multiple, prime number, square number, cube number

Addition and subtraction: Children build on their column methods to add and subtract numbers with up to seven digits, and they adapt the methods to calculate efficiently and effectively with decimals, ensuring understanding of place value at every stage.

Children compare and contrast methods, and they select mental methods or jottings where appropriate and where these are more likely to be efficient or accurate when compared with formal column methods.

Bar models are used to represent the calculations required to solve problems and may indicate where efficient methods can be chosen.

Multiplication and division: Building on their understanding, children develop methods to multiply up to 4-digit numbers by single-digit and 2-digit numbers.

Children develop column methods with an understanding of place value, and they continue to use the key skill of unitising to multiply and divide by 10, 100 and 1,000.

Written division methods are introduced and adapted for division by single-digit and 2-digit numbers and are understood alongside the area model and place value. In Year 6, children develop a secure understanding of how division is related to fractions.

Multiplication and division of decimals are also introduced and refined in Year 6.

Fractions: Children find fractions of amounts, multiply a fraction by a whole number and by another fraction, divide a fraction by a whole number, and add and subtract fractions with different denominators. Children become more confident working with improper fractions and mixed numbers and can calculate with them.

Understanding of decimals with up to 3 decimal places is built through place value and as fractions, and children calculate with decimals in the context of measure as well as in pure arithmetic.

Children develop an understanding of percentages in relation to hundredths, and they understand how to work with common percentages: 50%, 25%, 10% and 1%.

Year 5

	Concrete	Pictorial	Abstract
Year 5 Addition			
Column addition with whole numbers	<p>Use place value equipment to represent additions.</p>  <p><i>Add a row of counters onto the place value grid to show $15,735 + 4,012$</i></p>	<p>Represent additions, using place value equipment on a place value grid alongside written methods.</p>  <p><i>I need to exchange 10 tens for a 100.</i></p> 	<p>Use column addition, including exchanges.</p> 
Representing additions		<p>Bar models represent addition of two or more numbers in the context of problem solving.</p>  <p>Jen </p> <p>Holly </p> <p><i>£4,050</i></p>	<p>Use approximation to check whether answers are reasonable.</p>  <p><i>I will use $23,000 + 8,000$ to check.</i></p>

<p>Subtracting mentally with larger numbers</p>		<p>Use a bar model to show how unitising can support mental calculations.</p> <p>$950,000 - 150,000$ That is 950 thousands – 150 thousands</p>	<p>Subtract efficiently from powers of 10.</p> <p>$10,000 - 500 = ?$</p>																																																					

So, the difference is 800 thousands.
 $950,000 - 150,000 = 800,000$

**Year 6
Multiplication**

Multiplying up to a 4-digit number by a single digit number

Use equipment to explore multiplications.

4 groups of 2,345

This is a multiplication:

$4 \times 2,345$
 $2,345 \times 4$

Use place value equipment to compare methods.

Method 1

		3	2	5	5
		3	2	2	5
		3	2	2	5
		3	2	2	5
+		3	2	2	5
	1	2	9	0	0
	1		1	1	

Method 2

Understand area model and short multiplication.

Compare and select appropriate methods for specific multiplications.

Method 3

Method 4

		3	2	2	5
x					4
	1	2	9	0	0
	1		1	2	

Multiplying up to a 4-digit number by a 2-digit number

Use an area model alongside written multiplication.

Use compact column multiplication with understanding of place value at all stages.

		<table border="1" style="display: inline-table; margin-right: 10px;"> <tr><td></td><td></td><td>2</td><td>3</td><td>5</td></tr> <tr><td>x</td><td></td><td>2</td><td>1</td><td></td></tr> <tr><td></td><td></td><td></td><td></td><td>5</td></tr> <tr><td></td><td></td><td></td><td></td><td>30</td></tr> <tr><td></td><td></td><td>2</td><td>0</td><td>0</td></tr> <tr><td></td><td></td><td>1</td><td>0</td><td>0</td></tr> <tr><td></td><td></td><td>6</td><td>0</td><td>0</td></tr> <tr><td></td><td>4</td><td>0</td><td>0</td><td>0</td></tr> <tr><td></td><td>4</td><td>9</td><td>3</td><td>5</td></tr> </table> <div style="display: inline-block; vertical-align: top;"> <p>1 × 5</p> <p>1 × 30</p> <p>1 × 200</p> <p>20 × 5</p> <p>20 × 30</p> <p>20 × 300</p> <p>21 × 235</p> </div>			2	3	5	x		2	1						5					30			2	0	0			1	0	0			6	0	0		4	0	0	0		4	9	3	5	<table border="1" style="display: inline-table; margin-right: 10px;"> <tr><td></td><td></td><td>2</td><td>3</td><td>5</td></tr> <tr><td>x</td><td></td><td></td><td>2</td><td>1</td></tr> <tr><td></td><td></td><td>2</td><td>3</td><td>5</td></tr> <tr><td></td><td>4</td><td>7</td><td>0</td><td>0</td></tr> <tr><td></td><td>4</td><td>9</td><td>3</td><td>5</td></tr> </table> <div style="display: inline-block; vertical-align: top;"> <p>1 × 235</p> <p>20 × 235</p> <p>21 × 235</p> </div>			2	3	5	x			2	1			2	3	5		4	7	0	0		4	9	3	5

**Year 6
Division**

**Understanding
factors**

Use equipment to explore different factors of a number.

$24 \div 4 = 6$

$30 \div 4 = 7 \text{ remainder } 2$

4 is a factor of 24 but is not a factor of 30.

Recognise prime numbers as numbers having exactly two factors. Understand the link with division and remainders.

$17 \div 2 = 8 \text{ r } 1$

$17 \div 3 = 5 \text{ r } 2$

$17 \div 4 = 4 \text{ r } 1$

$17 \div 5 = 3 \text{ r } 2$

Recognise and know primes up to 100. Understand that 2 is the only even prime, and that 1 is not a prime number.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

<p>Dividing by a 2-digit number using factors</p>	<p>Understand that division by factors can be used when dividing by a number that is not prime.</p>	<p>Use factors and repeated division.</p> <p>$1,260 \div 14 = ?$</p>  <p>$1,260 \div 2 = 630$</p> <p>$630 \div 7 = 90$</p>	<p>Use factors and repeated division where appropriate.</p> <p>$2,100 \div 12 = ?$</p>																

$$1,260 \div 14 = 90$$

Dividing by a 2-digit number using long division

Use equipment to build numbers from groups.

182 divided into groups of 13.
There are 14 groups.

Use an area model alongside written division to model the process.

$$377 \div 13 = ?$$

$$377 \div 13 = 29$$

Use long division where factors are not useful (for example, when dividing by a 2-digit prime number). Write the required multiples to support the division process.

$$377 \div 13 = ?$$

		2	9	
13	3	7	7	
-	1	3	0	10
	2	4	7	
-	1	3	0	10
	1	7	7	
-	1	7	7	9
			0	

$$377 \div 13 = 29$$

			<p>A slightly different layout may be used, with the division completed above rather than at the side.</p> $\begin{array}{r} 3 \\ 21 \overline{) 798} \\ - 630 \\ \hline 168 \end{array}$ $\begin{array}{r} 38 \\ 21 \overline{) 798} \\ - 630 \\ \hline 168 \\ - 168 \\ \hline 0 \end{array}$ <p>Divisions with a remainder explored in problem-solving contexts.</p>
<p>Dividing by 10, 100 and 1,000</p>	<p>Use place value equipment to explore division as exchange.</p>  <p>Exchange each 0.1 for ten 0.01s. Divide 20 counters by 10.</p> <p><i>0.2 is 2 tenths. 2 tenths is equivalent to 20 hundredths. 20 hundredths divided by 10 is 2 hundredths.</i></p>	<p>Represent division to show the relationship with multiplication. Understand the effect of dividing by 10, 100 and 1,000 on the digits on a place value grid.</p>  <p>Understand how to divide using division by 10, 100 and 1,000.</p> <p>$12 \div 20 = ?$</p>  <p>$12 \div 10 = 1.2$ $1.2 \div 2 = 0.6$</p>	<p>Use knowledge of factors to divide by multiples of 10, 100 and 1,000.</p> <p>$40 \div 50 = \square$</p> <p>$40 \rightarrow \div 10 \rightarrow \div 5 \rightarrow ?$</p> <p>$40 \rightarrow \div 5 \rightarrow \div 10 \rightarrow ?$</p> <p>$40 \div 5 = 8$ $8 \div 10 = 0.8$</p> <p>So, $40 \div 50 = 0.8$</p>
<p>Dividing decimals</p>	<p>Use place value equipment to explore division of decimals.</p>	<p>Use a bar model to represent divisions.</p>	<p>Use short division to divide decimals with up to 2 decimal places.</p>

8 tenths divided into 4 groups. 2 tenths in each group.

0.8			
?	?	?	?

$$4 \times 2 = 8$$

$$8 \div 4 = 2$$

So, $4 \times 0.2 = 0.8$

$$0.8 \div 4 = 0.2$$

$$\begin{array}{r} . \\ 8 \overline{) 4 \cdot 2 \ 4} \\ \underline{0 } \\ 8 \overline{) 4 \cdot 2 \ 4} \\ \underline{0 } \\ 8 \overline{) 4 \cdot 2 \ 4} \\ \underline{0 } \\ 8 \overline{) 4 \cdot 2 \ 4} \end{array}$$
