

6th June 2018

Dear Parents/Carers

Online safety is an important issue that affects anyone with access to the internet.

Communication is the most important thing; you may think you already do enough to protect your children by banning certain games or sites and installing filters or antivirus software onto home devices.

Unfortunately, this approach does not take into account that children could access the internet elsewhere or may intentionally bypass systems without you knowing. Would you know how to delete a YouTube video your child had unwittingly posted in order to secure their safety?

Banning and blocking is not the answer; the most important thing is open discussion and empowering children to make safer and more sensible choices online.

In this digital age of social media, where children's knowledge often outstrips the adults, we would very much like to offer you an opportunity to keep up with your children by inviting you to an internet safety session-informal yet informative with refreshments. We will also offer a place where your children will be supervised so you can attend easily.

Please come along on Wednesday 13th June at 3.30pm and we promise to equip you with the knowledge and power you need to support your children in this fast moving technological world!

Yours sincerely

Mr A Fugill & Mrs D Kilpin
